

Deliverable N° 3.3

Workshop with relevant ERA-Nets and JPIs

Lead participant: European Forest Institute (EFI)

PROPRIETARY RIGHTS STATEMENT

THIS DOCUMENT CONTAINS INFORMATION, WHICH IS PROPRIETARY OF THE **FORESTERRA** CONSORTIUM. NEITHER THIS DOCUMENT NOR THE INFORMATION CONTAINED HEREIN SHALL BE USED, DUPLICATED OR COMMUNICATED BY ANY MEANS TO ANY THIRD PARTY, IN WHOLE OR IN PARTS, EXCEPT WITH THE PRIOR WRITTEN CONSENT OF THE **FORESTERRA** COORDINATOR. THIS RESTRICTION LEGEND SHALL NOT BE ALTERED OR OBLITERATED ON OR FROM THIS DOCUMENT.

Grant Agreement n°: 291832

Project Acronym: FORESTERRA

Project title: Enhancing FOrest RESearch in the MediTERRAnean through improved coordination and integration

Funding Scheme: Coordination and support action

Date of latest version of Annex I against which the assessment will be made: 27th October, 2011

Deliverable Number: 3.3

Deliverable Title: Workshop with relevant ERA-Nets and JPIs

Code name: FORESTERRA_WP3_D3.3

WP: Scientific cooperation with other Mediterranean Climate Areas

Date of submission: January 2014

Dissemination level: Public

Lead participant: EFI

Author: Victoria Sanz

WP leader: EFIMED

Coordinator: David González

EC project officer: Doru Irimie

Publishable abstract:

A specific workshop to discuss potential topics of relevance with other existing ERA-Nets and with other Mediterranean Climate Areas, has been organised in Barcelona, on the 4 September 2013, in the framework of the EFIMED Week. The aim of the workshop was to maximise synergies and the impacts of research.

During the workshop, two important news were announced:

- The FORESTERRA joint call for proposal on the topic "Mediterranean-scale approach to study global change drivers, impacts & indicators on forest ecosystems and to foster forest system resilience through managing biodiversity", to be launched the 4th of November 2013.
- The FORESTERRA Networking Workshop: towards building a multi-level transnational network in Mediterranean forestry research, to take place in Marseille, France, on 12-13 December 2013.

Participants exchanged experiences and knowledge on methodologies.

The conclusion was that interaction among other existing initiatives (ERA-Nets and JPIs) is essential for running the activities more effectively and fostering a more effective and harmonized environment. A long-term cooperation and synergy among ERA-Nets and between ERA-NETs and other research policy actors such as JPIs, SCAR, and KBBE Technology Platforms is very important for the future.

ANNEXES.....	13

1. Introduction

A workshop with relevant ERA-Nets and JPIs, to discuss potential topics of relevance for other existing ERA-Nets and to develop some other major activities, took place at the Sant Pau UNESCO World Heritage Site in Barcelona, Spain, on 4 September 2013.

It was planned for Month 24 according to the Description of Work, but the FORESTERRA Project Management Committee decided to change the date in order to take advantage of the EFIMED Annual Meeting, which is the largest Mediterranean forest research gathering during the year. In this way, the FORESTERRA workshop benefitted from the presence of scientists from various disciplines from all over the Mediterranean and beyond.

The Chair of the EFI Board, Jørgen Bo Larsen, presided over the opening session which was attended by over 100 leading researchers, practitioners and policy makers in Mediterranean forestry. Opening addresses were given by representatives from three entities: Juan Maria Vazquez from the Spanish Government's Ministry of Economy and Competitiveness (MINECO), Jordi Bachs, Managing Director of the Santa Creu i Sant Pau Private Hospital Foundation and Joana Ortega, Vice-president of Catalonia.

Following the opening, EFIMED's new Head of Office, Inazio Martínez de Arano, shared his hopes and expectations for EFIMED's future, identifying some of the challenges that lie ahead. Building on the work of the past, it will be important to implement, evaluate and develop the Mediterranean Research Agenda and to improve forest-related policies and management with a trans-disciplinary cross-sectorial approach. He is keen to increase the impact of EFIMED's work through exploring synergies with the offices and organisms that are already, or will soon be, based in Sant Pau and with network partners.

After the successful workshop in Tunis last year, at which participants played big role in defining the strategic themes for the FORESTERRA ERA-Net, the FORESTERRA workshop this year brought members up to date with progress on the forthcoming call and widened perspectives by welcoming presentations from other Mediterranean Climate Areas and from other ERA-Net initiatives.

2. Workshop with relevant ERA-Nets and JPIs

David González, FORESTERRA Coordinator, presented the progress and future expectations of the ERA-Net; mapping research activities were identified by Giuseppe Scarascia and Marc Palahí presented the FORESTERRA Strategic Plan.

The international joint call for proposal on the topic "Mediterranean-scale approach to study global change drivers, impacts & indicators on forest ecosystems and to foster forest system resilience through managing biodiversity", to be launched the 4th of November 2013, was announced.

The strategic themes of FORESTERRA were presented, alongside synergies and the impacts of research with other related initiatives. Some EFIMED network members made presentations or posters on their institution / project / activity in relation to one of the four FORESTERRA strategic themes. Participants had the opportunity to network and take steps towards building trans-national consortia for the forthcoming calls for proposals.

Furthermore, the FORESTERRA **Networking Workshop: towards building a multi-level transnational network in Mediterranean forestry research** which took place in Marseille, France, on 12-13 December 2013, was announced. The aim of this workshop is to foster the clustering of existing national research organizations as well as of relevant and strategic research projects with the final aim of improving future coordination and maximize the research impacts.

During this workshop, FORESTERRA maximized synergies and the impacts of research not only with other related initiatives, but also with other Mediterranean Climate Areas, in order to promote joint activities and exchange of information.

Presentations given at the workshop are summarised below and they are available in Annex 1 of this deliverable.

2.1. ERA-Nets and JPIs: experiences and opportunities

- **Water JPI: Framework of opportunities for joint work. Armela Dino.**

Armela Dino presented the Water JPI and opportunities for joint work. A comparison with different initiatives was done (ERA-Nets, Article 185 programmes and Joint Programming Initiatives). The objective in JPIs is defined by grand societal challenges, but the objective in ERA-Nets is defined by scientific field. Details on the Water JPI were presented (specific objectives, Strategic Research and Innovation Agenda, Ecosystem Sustainability, Competitiveness in Water Industry and the Pilot Call for Proposals launched in 2013).

The main conclusion was that the joint collaboration between Water JPI and FORESTERRA would be very positive; FORESTERRA domains would expand geographically and thematically and Water JPI would increase its expertise through the already achieved FORESTERRA result.

One of the FORESTERRA research themes identified for a joint call for proposals is related to Water JPI: “Integrated watershed management for delivering forest water-related services”.

- **ERANETMED: Mediterranean cooperation through ERANET joint activities and beyond. Maroun El Moujabber.**

Maroun El Moujabber gave an overview of the ERANETMED (partners, countries, duration, budget, objective, activities and expected impacts). Its Kick-off meeting was planned in Istanbul, the 4th and 5th of November 2013.

- **FACCE – JPI: State of Play. Christine Bunthof.**

Christine Bunthof presented the main achievements to date in FACCE – JPI (the Strategic Research Agenda adopted in December 2012, the innovative mapping and foresight, the implementation Plan 2014 – 2015 to be adopted in October, the organisation of annual workshops with interested initiatives and with ERA-Nets and the five joint actions on-going or in preparation).

There are 16 ERA-Nets identified with thematic complementarities to FACCE. Annual workshops are organising in order to map complementarities and explore joint actions. The main conclusion was that interaction is essential to avoid duplication and to be able to launch joint calls.

- **PLATFORM: Implement and interact for Impact. Christine Bunthof.**

Christine Bunthof explained the main characteristics for the ERA-Nets, as instruments for building the European Research Area, which aim is the coordination and collaboration between national and regional programmes in a longer-term perspective and with the participation of programme owners and programme managers. She pointed out that in the framework of the ERA-Nets over 400 calls for proposals have been implemented, mostly by virtual common pot scheme. Combination national rules and international collaboration remains a challenge. The conclusion was that interaction is the key to the success.

PLATFORM offers a multi-faceted forum for the bioeconomy ERA-Nets community, united by a targeted scope, each with its topic and target (group). Collaboration possibilities have been identified by matchmaking session in PLATFORM Workshop with surveys about interests for collaborations.

A PLATFORM workshop titled 'ERA-Nets for the future' is being planned in Leiden, the 13th and 14th of February, 2014. The results of surveys and analysis done by various PLATFORM tasks will be presented. Suggestions for deepening analysis, new topics to look into, and updating or extending surveys and other assessments will be used in the drafting of a proposal for continuation. Furthermore, a session about European Research and Innovation Programming will be held in order to get a sharper picture of the unique contributions that P2P networks bring and how P2Ps can best operate – in coordination with others – to deliver and have impact. The outcomes of this Workshop will contribute to elaborate the deliverable 'PLATFORM vision and roadmap', which will contain recommendations and plans for programming in view of the diversified system, scoping for topics/needs for collaboration among Member States and optimal ERA-Net operation (calls, other activities, collaborations).

2.2. Networking outside Europe: Short statements from MCA scientists and funding agencies

Programme managers and forest scientists from different Mediterranean Climate Areas attended this workshop, in order to promote joint activities and exchange of information:

- **Five key challenges for forestry in Australia. Jerry Vanclay (Australia).**

The Australian expert Jerry Vanclay, from Southern Cross University, commented the key challenges for forestry in Australia (public understanding of forest management and condition of fire ecology and suppression, Payments for Environmental Services for ‘undervalued’ forests for public use of forests, complexity and environmental change) and gave a description of the forests of the Mediterranean Climate Areas. He reflected about the community attitudes, some of them should change in order to get beneficcits and better forests.

- **Chilean Mediterranean Forests (matorral). Rosa Alzamora (Chile).**

The Chilean researcher Rosa Alzamora, from the Universidad Austral, pointed out the wide variety of ecosystems in Chile. Mediterranean forest occupies central Chile and has problems of land use change, loss and fragmentation, and forest fire. She identified some needs of research: restoration, valuing ecosystem services and biodiversity as a driver of value. Chilean funds for research come from the National Commission for Scientific and Technological Research (CONICYT), the Chilean Economic Development Agency (CORFO) and the National Forest Service (CONAF).

- **University of California, Berkeley Forestry Research / EFIMED. Gregory Biging (USA).**

The American scholar Gregory Biging, from the University of California, Berkeley, commented that Forest Research in California has transformed from disciplinary research (economics, silviculture, ecology, mensuration, wildlife) to research that crosses both disciplinary and regional/national boundaries. The research interests of FORESTERRA and UC Berkeley have high correspondence, particularly on global change and biodiversity. Given funding through NSF or USDA for joint research between the groups, UC Berkeley faculty response would be quite strong.

- **Food, Agriculture and Fisheries and Biotechnology (FAFB NCP). Bongani Ndimba (South Africa).**

The South African researcher and project manager, Bongani Ndimba, from the Agricultural Research Council, gave an overview of the different uses of land in South Africa, being only the 1 % forestry and the 68.60 % grazing, 13.80 % arable, 9.60 % natural conservation and 6.90 % other. He commented the high number of people who dependent on forestry industry. According to Bongani Ndimba, FORESTERRA made a good strategic choice.

3. FORESTERRA & SUMFOREST Workshop

Following the development of the networking activities and the integration of research programmes, it was organised a workshop between FORESTERRA and the newcomer SUMFOREST ERA-Net. The venue of the meeting was in Krakow (Poland), last 8th of July and was attended by 19 people representing the different Work Packages leaders of each project.

The FORESTERRA attendance was MINECO, FCT, CRA, EFIMED and INRA; with regards to SUMFOREST, the partners involved in the workshop were BMLFUW, MMM, IBL, INIA, BLE and BFW. Furthermore, MIPAFF, INEA and MAE which are involved in both ERA-Nets, were in Krakow as well (see below the attending people).

The objective of the event was to maximise synergies and identify and define joint strategic topics. Aim of the meeting: a discussion on SUMFOREST-FORESTERRA cooperation and joint activity plan. The discussion could include, inter alia, strategic topics identified in the FORESTERRA research agenda and their relevance at the European level, as well as possibility for SUMFOREST to maintain the FORESTERRA information/web and database on research activities alive after 2015, etc.

The workshop was opened by Adam Kaliszewski, Adam (IBL) and Annamaria Marzetti (MIPAAF) who thanked the participants for attending the meeting. The first session was a presentation of each ERA-Net in order to explain the background, objectives and milestones to the rest of the audience.

Martin Greimel (BMLFUW), as coordinator, started this session presenting an overview of SUMFOREST, describing mainly the workplan structure since this ERA-Net is just running up. Then, Liisa Kaar (MMM) presented the WP2 Mapping Forest research initiatives and transnational and the WP4 Strategic activities; Johannes Bender from BLE, made the WP5 Joint calls and Martin Kalinowski (IBL) and Annamaria Marzetti (MIPAFF) presented jointly the WP6 International cooperation. The second part of the session was devoted to FORESTERRA and its presentation made by the Coordinator, David González. Then, Giuseppe Scarascia (CRA) presented the status of the WP2 Mapping and information exchange, Inazio Martínez de Arano (EFIMED) the WP3 Strategic activities), Gema Herrero (INRA), the WP4 Implementation of Joint activities, Marta Abrantes (FCT), the WP6 Scientific cooperation with Mediterranean Climate areas and Almudena Albertos, both WP5 Transnational Joint research funding and WP7 Spreading excellence.

The main initiatives agreed is the presentation of a draft plan which will show the possible future scenarios about Forest Research in the EU research framework; it will include also a road map describing different joint working groups between FORESTERRA and SUMFOREST. Furthermore, another challenge is the transfer of knowledge through different undertaking activities such as:

- 1) Share knowledge of mapping;
- 2) Joint research units;
- 3) Joint call topic;
- 4) Joint programme on forestry (Forest JPI)

ANNEXES

Annex 1 . Presentations of the Workshop with relevant ERA-Nets and JPIs

The presentations of the Workshop with relevant ERA-Nets and JPIs held in Barcelona, on the 4 of September 2013, are available at:

http://www.efimed.efi.int/portal/events/annual_meeting/efimed_week_2013/annual_meeting_2013/

Annex 2. Programme of the Workshop with relevant ERA-Nets and JPIs

FORESTERRA Workshop with relevant ERA-Nets and JPIs

Sant Pau Art Nouveau Site, Barcelona, Spain

Wednesday 4 September 2013

08:00 Registration

09:00 Session 1: Opening Chair: Jørgen Bo Larsen, Chairman of EFI Board

09:00 - 09:45 Opening of the EFIMED Annual Meeting

Juan María Vazquez, DG for Scientific and Technical Research, Government of Spain

The Honorable Joana Ortega i Almany, Vice-president, Government of the Generalitat of Catalunya

09:45 Session 2: EFIMED Report

09:45 - 10:05 EFIMED achievements and way ahead, Inazio Martínez de Arano, EFIMED

10:05 - 10:25 Questions and discussion

10:50 Session 3: FORESTERRA Workshop Chair: Inazio Martínez de Arano, EFIMED

10:55 - 11:10 FORESTERRA ERA-Net: Progress and future expectations, David González, MINECO

11:10 - 11:25 Mapping activities, Giuseppe Scarascia, University of Tuscia

11:25 - 11:45 FORESTERRA ERA-Net Strategic Plan, Marc Palahí, EFI

11:45 - 13:15 Increasing FORESTERRA ERA-Net impact: Synergies with the ERA and MCAs

Introduction: Andreas Kleinschmidt, FCBA

ERA-Nets and JPIs: experiences and opportunities

Xavier Le Roux (BiodivERsA2), Armela Dino (Water JPI), Maroun El Moujabber (ERANETMED), Christine Bunthof (Platform), (JPI FACCE)

Networking outside Europe

Short statements from MCA scientists and funding agencies: Jerry Vanclay (Australia), Rosa Alzamora (Chile), Gregory Biging (USA) and Bongani Ndimba (South Africa)

13:15 - 13:30 Wrap-up of the FORESTERRA session

14:30 Session 4: EFIMED Market place and Networking Chair: Giuseppe Scarascia, University of Tuscia

EFIMED Market Place: Network members' presentations in relation to FORESTERRA themes

Networking / Consortium building for FORESTERRA call
